A solution-focused developer with 3 years of experience in frontend technologies, specializing in building dynamic, responsive, and optimized Mobile and Web applications that effectively meet project objectives, prioritizing quality, performance, and security.

Skills

React │ **React Native** │ **JavaScript** │ **Node JS** │ **TypeScript** │ **Next JS** │ **Redux** │ **HTML5** │ **CSS3** │ **REST** — *API* │ **GIT** │ **JSON** │ **AJAX** │ **ExpressJS** │ **JWT** │ **MongoDB** │ **GraphQL** │ **Adobe** — *PS / AI*

Professional Experience

Frontend Engineer, *Freelance*   2022 – 2024
                                                                                   Dubai, UAE
- Utilizing front-end technologies to create highly responsive and user-friendly web applications, ensuring optimal performance and cross-browser compatibility.
- Utilized GraphQL alongside REST APIs to reduce data fetching time by 40%, minimizing over-fetching and under-fetching, resulting in a 25% improvement in app performance and a smoother client-server interaction
- Integrated MongoDB with Node.js applications using Mongoose, enabling seamless interaction between the application and the database, with strong data validation and schema design.
- Integrated third-party APIs and services such as Stripe for payments and Stytch for user authentication
- Built Static Site Generation (SSG) and Server-Side Rendering (SSR) websites using NextJS, enhancing SEO and improving page load times by 30%.

Frontend Developer / Administrator, *Landmark*   2021 – 2022
                                                                                   Dubai, UAE
- Developed & maintained the company website, making substantial contributions to highlight a diverse portfolio encompassing over 30 projects.
- Designed 20+ custom icons and logos to elevate the visual appeal of the company website, improving the overall UI/UX experience.
- Configured email integration, enabling seamless user communication through the website's contact form.

Projects

ReelVault 🔗   2024
- Engineered a responsive web application built as a platform for film enthusiasts to browse and stream over 1 million movies & shows, by utilizing the TMDB & 2Embed APIs. **View Project** 🔗
  Tech Stack: **React, NodeJS, Redux, GraphQL, Stytch User Authentication**

CryptoOracle 🔗   2023
- Developed a web app using the CoinGecko API, enabling users to explore 10,000+ cryptocurrencies in real-time data on price, market capitalization, trading volumes, & price charts. **View Project** 🔗
  Tech Stack: **React, NodeJS, Redux, REST API**

Ecomxpress 🔗   2023
- Developed an e-commerce web app using NextJS, MongoDB, Stripe, and Stytch, enabling secure browsing, real-time product availability, secure payment, and user authentication. **View Project** 🔗
  Tech Stack: **NextJS, Stripe, MongoDB, Stytch**
